

More freedom to work your way

See how far the evolved GN 9120 will take you

When was the last time you had only one thing to do?

You're working faster and trying to accomplish more. Like solving problems down the hall and interacting with everyone around you. And while most technology has evolved to meet your changing needs, your phone has not. It still ties you to your desk with a cord that's holding you back in more ways than one.

What you need is an evolved communications solution that helps you keep the pace. The evolved GN 9120 headset gives you full wireless freedom to move about the office, yet still keeps you in touch. With an incredible range of up to 150 m¹, up to 12 hours of talk time and a host of dazzling features, the GN 9120 lets you get more done. What's more, you can now accessorize your GN 9120 with even more features and functionality!

GN 9120

Raised volume and multi-function buttons make the headset even easier to use!

Wireless) Mobility) Freedom)

What boom arm is right for you?

The GN 9120 comes with your choice of a microphone boom arm. Choosing the boom is mainly about personal preference, but also depends if you're in a quieter or noisier office environment.

Midi boom

Unobtrusive and compact.

- Great in private or quiet office environments.
- Noise-filtering microphone with excellent sound transmission.

Micro boom

Discreet and sleek.

- Great for typical open office environments.
- Standard microphone with excellent sound transmission.

Flex boom

Flexible and personal.

- Great for open, loud office environments.
- Noise-cancelling microphone with excellent noise reduction.

What wearing style suits you today?

The GN 9120 offers both the headband and the earhook wearing styles. And, you can change wearing styles as often as you wish! Naturally, both wearing styles are yours no matter which boom you choose.

Headband

- The discreet, over-the-head wearing solution.

Earhook

- The light and comfortable on-the-ear wearing style.

Why not accessorize your GN 9120 and be even more productive?

GN 1000

Adding the GN 1000 Remote Handset Lifter to your GN 9120 gives you the convenience of remote call answering/ending. Now you can answer/end calls away from your desk, no matter where in the office your work and wireless headset take you!

Extra headset

To use with your primary GN 9120 unit, you can get an extra GN 9120 headset. The extra headset can be loaned to colleagues or guests to join in on conference calls.

Charger base

The GN 9120's charger-only base unit (GN 9160) can be set up in a meeting room or other location. Ideal when multiple headsets are used with a single base unit. It's the perfect place to charge or store an extra conference calling or guest headset!

Experience the benefits of a wireless headset

Mobility

With the wireless GN 9120 you can move up to 150 m¹ away from your desk during a call! Walk about, share and refine your ideas or retrieve materials. And, with up to a 12-hour talk time, you won't be held back.

Efficiency

The GN 9120 frees your hands for multi-tasking and gives you a host of unique benefits like fully mobile conference calling. Work your way, multiply **your** productivity.

Ergonomics

Don't sacrifice personal comfort when talking on the phone. The GN 9120 lets you say goodbye to aching muscles and neck strain caused by propping a telephone handset between your head and shoulders.

Security

Featuring a multi-layered security system, the GN 9120 gives you complete peace of mind. Its signal "hops" (90 times/second) and voice encryption means security so tight no one will eavesdrop on your calls.

Efficiency) Professionalism) Security)

Thinking on your feet

What inspires you? Talking to people around you. Sharing and refining your thoughts. Anything but sitting at your desk. The GN 9120's wireless design gives you the freedom to think on your feet without cutting you off from your phone.

Multi-tasking made easy

When was the last time you had only one thing to do? Being successful today starts with multi-tasking. But because talking on a phone ties your hands, phone calls limit your ability to get things done. The GN 9120 frees your hands and your mind, allowing you to accomplish two or even three things at once.

Mobile conference calls – without the room

Conference calls have become a way of life. The GN 9120's multi-unit conferencing capability lets up to four headsets join a call. And because the GN 9120 has a range of 150 m², you can hold your conference from virtually anywhere in the office once you're connected. Calls are clearer, private, and completely secure.

Remote call answering/ending

Want to end the mad dash to the desk when the phone rings? Pairing the GN 1000 RHL remote handset lifter with the GN 9120 adds a new dimension, allowing you to answer and end calls remotely when away from your desk. You can also get a special version of the GN 9120 that works with your telephone's built-in remote answering/ending functionality. No more running, no more missed calls.

Small wonder – major comfort

The GN 9120 changes the way you work – and the way you think about headsets. It's super lightweight and gives you all-day wearing comfort, and you can switch between wearing it over the head or on the ear as often as you like. There are even three different boom options designed to fit your style.

Smart power management

The evolved GN 9120 isn't just another pretty headset, it's a smart one too. Smart power management means that the headset draws less battery power when you're closer to your base, extending its battery life. And, you can even choose between standard and low power modes. If you usually work closer to your desk, the low power mode will extend the unit's battery charge. When fully charged, you'll enjoy up to a 12-hour talk time with the GN 9120!

Handsfree benefits

GN 9120 – Freedom and productivity

- Truly wireless headset for complete freedom and ease of use
- Full mobility in the office – up to 150 m¹ range & up to a 12-hour talk time
- Sleek design, choice between 3 boom arms & remote call answering/ending (optional)
- Alluring benefits like telephone conferencing – fully mobile, hassle-free conference calling

Your work environment has evolved – and so has the headset. The wireless GN 9120 headset is the future of executive telephony. Giving you an incredible 150 m¹ of range in the office, up to a 12-hour talk time plus a host of unique features and benefits, the GN 9120 lets you get more done.

Conference calls have become a way of life in today's business. The GN 9120's multi-unit conferencing capability lets up to four headsets join in on a call. Enjoy fully mobile conference calls without the hassle of crackling speakerphones or meeting room bookings.

Adding the GN 1000 RHL remote handset lifter with the GN 9120 lets you remotely answer/end calls away from your desk. A special version of the GN 9120 even works with special telephone's built-in remote answering/ending functionality.

Flexibility, comfort and styling are hallmarks of the GN 9120, which offers a choice of three different microphone boom arms and two wearing styles. The GN 9120 also complies with the toughest acoustic shock protection standards, eliminating overly-loud sounds, and is compatible with virtually any telephone.

¹ Based on use in standard open office environments.

² The GN 9120 works with the GN 1000 RHL (accessory) or with certain telephones that have built-in remote call answer/end functionality. Contact your GN Netcom representative for details.
