

PLANTRONICS CS55™

PROFESSIONAL WIRELESS HEADSET SYSTEM

All-around performer.

Superior digital sound meets enterprise mobility. The Plantronics CS55 professional wireless headset system combines the clarity of traditional corded technology with the mobility and convenience of wireless, so employees can move around to wherever business takes them—without interrupting or missing a call. The Plantronics CS55 was the first headset in the United States to implement 1.9 GHz DECT™ voice-dedicated wireless technology.

The CS55 delivers:

- **The freedom of mobility.** Mobile multitasking—conferring with colleagues, walking to the printer, pouring a cup of coffee—need not interrupt important calls up to 300 feet from a desk phone.
- **Superior quality, secure communications.** Voice-dedicated 1.9GHz DECT™ technology provides uncompromised audio quality and the lowest probability of interference.
- **All day availability.** Extended battery life delivers approximately 10 hours of talk time and the option of remote answering,* so they'll never miss calls when away from their workstation.
- **Crystal-clear conversation.** An extended boom and noise-canceling microphone filter out background noise, so listeners hear conversations clearly.
- **Customizable comfort.** Both stylish and comfortable, the CS55 can be converted to over-the-ear, over-the-head or behind-the-head wearing styles.

*With optional HL10 Handset Lifter

Telephone not included.
