

OfficeServ Hospitality and PMS Vendor Compatibility List

Samsung OfficeServ Hospitality is the Hotel Management Software suitable for any front of house system, no matter how big or small.

Samsung's OfficeServ Hospitality is ideal for use as a standalone system for guesthouses and smaller hotels as it contains a complete reservations feature set including guest billing.

Alternatively for larger hotels, it can be used to fully integrate the OfficeServ with new or existing PMS or voicemail and messaging systems to provide complete telephony integration.

Please see the list below of PMS that OfficeServ Hospitality will interface with:
